

Propel Attestation Statement

Project Name:

Project Address:

Customer ID:

We, the installer, attest to the following regarding the submitted solar PV and/or ESS storage design plan set for this project:

- **Accuracy:** The submitted drawings, specifications, and documentation accurately represent the proposed solar photovoltaic and/or ESS storage system for the project site.
- **Code Compliance:** The design complies with all applicable codes, standards, and regulations, including the National Electrical Code (NEC), local amendments by the Authority Having Jurisdiction (AHJ), and utility interconnection requirements.
- **Structural & Electrical Integrity:** System layout, wiring, load calculations, and structural assessments (including roof attachments) have been reviewed and are valid for the installation location and configuration.
- **Qualifications:** The installer holds all required licenses, certifications, and approvals for the project's jurisdiction.
- **Truthfulness:** All information provided is true, complete, and submitted in good faith. Any deviations from approved plans may require AHJ re-approval.
